

SYSTEM AND METHOD FOR
PROVIDING AN ENTERPRISE-BASED COMPUTER SECURITY POLICY

ABSTRACT

A system and method for providing an enterprise-based security policy are described. In one embodiment, the system includes a central agent that is configured to retrieve a policy skin from a database and to transmit the policy skin to a host. The system further includes a data gathering engine that is configured to collect host data related to the host. In addition, the system includes a policy engine that is configured to execute the policy skin against the host data to determine security policy compliance.
